

Foliar K27™

FOLIAR K27™ is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis.

Application Rates and Guidelines

FOLIAR K27™ is water soluble.

Apply recommended rates in 1 - 2 gallons of water per 1000 ft² as a carrier.

For best results, apply early in the morning or evening. Allow foliar applications to dry before irrigating to maximize plant absorption. Due to the high efficiency of this product, and potassium's role in regulating guard cells, be sure that soil moisture is adequate prior to application ensuring availability of water.

 **FOLIAR APPLICATION - COOL SEASON TURF:**
Apply 3.0-4.0 oz per 1000 ft² weekly or bi-weekly as needed.

 **FOLIAR APPLICATION - WARM SEASON TURF:**
Apply 3.0-5.0 oz per 1000 ft² weekly or bi-weekly as needed.

Product Compatibility: Due to various types of water quality and fertilizer sources available, it is important to always perform a compatibility test prior to implementing any new tank mix to identify potential issues and/or incompatibilities.
