

Phospro™

PHOSPRO™ is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis.

Application Rates and Guidelines

PHOSPRO™ is water soluble.

Apply recommended rates in 1–3 gallons of water per 1000 ft² as a carrier. For best results, apply as a foliar early morning/evening, or lightly water in after application, to promote root uptake, seed germination, and/or sod establishment.

FOLIAR APPLICATION - COOL AND WARM SEASON TURF:

Apply 2.0-4.0 oz per 1000 ft² bi-weekly or as needed.

SOIL APPLICATION - SEED GERMINATION - SOD ESTABLISHMENT:

Apply 2.0-6.0 oz per 1,000 ft² weekly based on stage of growth/establishment.

INJECTION / FERTIGATION - IN TANK WITH AGITATION

Apply 1.0-2.0 qts per acre weekly when soluble phosphorus is needed.

Product Compatibility: Due to various types of water quality and fertilizer sources available, it is important to always perform a compatibility test prior to implementing any new tank mix to identify potential issues and/or incompatibilities.
