

Micro Max™

1-0-1

Micro Max was created to be a perfect tank mix partner when applied with 8% Iron Chelate, or other stand-alone iron products including ferrous sulfate. This product allows you to target a desired Iron to Manganese ratio based on various site specifics such as type of turf grass and/or time of year.

Rich in organic acids and plant beneficial compounds, this product is effective on all types of turfgrass during any condition.

FEATURES AND BENEFITS

- Micro Max offers the highest quality micronutrient sources, organically chelated, using plant beneficial pre-digested compounds that can be easily metabolized to facilitate efficient absorption, and maximize turf health response.
- Whether it is chlorophyll or carbohydrate production, cell wall integrity or enzymatic responses, Micro Max ensures you have no limiting factors when it comes to micronutrients.
- The addition of Solu-Plus in this product, works to maintain nutrient availability, enhance turf absorption, and/or root uptake. Multiple vitamins, enzymes and organic acids compliment the micronutrient package. To deliver all the essential micronutrients in balance, combine Micro Max and 8% Iron Chelate.

PRODUCT HIGHLIGHTS

- Solu-Plus Technology
- Pre-Digested Chelating Agents
- Multiple Vitamins & Enzymes
- Multiple Micronutrient Sources
- Amino, Humic and Fulvic Acids
- Effective in All Growing Conditions
- Aids in Chlorophyll Production
- Natural Fermentation Extracts
- Compatible with ferrous sulfate
