

Move N Hold™

5-0-0

Move N Hold™ is a soil conditioner, based on fully biodegradable components, non-ionic surfactant and polymers, complexed with organic and amino acids.

Move N Hold™ provides the following benefits:

- Aids in water penetration, reduced run-off, and uniform soil moisture.
- Retains moisture in sandy soils to reduce water use, and help manage Localized Dry Spot (LDS).
- Organic & Amino Acids in Move N Hold™ can enhance nutrient availability and stimulate microbial activity.
- Contains no salts - Very stable at a low pH.

Active Ingredients: natural polymers, and derivatives. Move N Hold™ is not a plant food product.

Krusty™

3-0-0

Krusty™ is a soil conditioner for use on all soils, based on fully biodegradable components, non-ionic surfactants and polymers, complexed with organic and amino acids.

Krusty™ provides the following benefits:

- Aids in water penetration, infiltration, and reduces run-off.
- Improves water distribution and depth of moisture penetration.
- Organic and Amino Acids in Krusty may enhance nutrient availability and microbial activity.
- Contains no salts - Very stable at a low pH. Active Ingredients: natural polymers, and derivatives.
- Proprietary soil conditioning package will help to reduce compaction

Krusty is not a plant food product.

FEATURES AND BENEFITS

- These environmentally friendly products can help with improved water penetration, reducing run-off when implementing water reduction practices, delivering water deeper, more efficiently, and more uniformly.
- Krusty improves tight soils while having the ability to retain adequate water in sandy soils, and assist with the management of Localized Dry Spot. Use of patent pending technology during the manufacturing process, provides a product rich in organic acids and aminated compounds to complex the biodegradable components and polymers.
- Both STS Wetting agents can improve solubility of nutrients and their uptake, while also stimulating microbial activity.

i For recommended rates and usage, along with a complete STS plant health analysis chart, see inside back cover.

PRODUCT HIGHLIGHTS

- Contains No Salts
- Very Stable in Low pH
- Organic and Amino Acids
- Non-ionic Organic Surfactant
- Stimulate Microbial Activity
- Improve Nutrient Uptake and Availability
- Organic and Biodegradable Ingredients
- Highly Effective Soil Penetrant
- Reduced Compaction
