

EMPRUV™

3-0-6

EMPRUV 3-0-6 rewards turf managers with reduced stress potential by providing multiple elicitors that will trigger plant defense mechanisms, as well as working to enhance the plant's own immune system. EMPRUV is a result of years of research and development.

Through our proprietary process, EMPRUV delivers a blend of natural fermentation extracts and microbial metabolites, natural growth promoters, enzyme precursors and components to enhance absorption.

FEATURES AND BENEFITS

- EMPRUV 3-0-6 could be part of a BMP fertility plan to naturally promote optimum plant health.
- Contains natural growth promoters and enzyme precursors.
- Rich blend of Natural Fermentation Extracts and Microbial Metabolites.

IMPORTANT: EMPRUV 3-0-6 is compatible with all STS products and most raw source materials. This includes soluble powders, calcium nitrate, potassium nitrate, lo-biuret urea, ammonium sulfate, and ammonium nitrate. Due to the many types of water quality, always perform a compatibility test prior to tank mix to identify any potential site-specific issues.

PRODUCT HIGHLIGHTS

- Increased Stress Resistance
- Natural Fermentation Extracts
- Microbial Metabolites
- Complexed using Organic and Amino Acid Base
- Growth Promoters
- Enzyme Precursors
