

Nitro-Blend™

27-0-0

Nitro-Blend 27-0-0 is a high efficacy form of liquid Nitrogen designed for large area applications. Delivering a combination of Nitrogen sources along with our proprietary fermentation process to add extracts will enhance intake.

Nitro-Blend 27-0-0 contains pre-digested carbon and stabilizers to reduce potential for volatility and "gassing-off". Pre-digested organic acids along with vitamins and enzymes make this an ideal choice when spraying wall to wall.

IMPORTANT: Nitro-Blend 27-0-0 is compatible with all STS products and most raw source materials. This includes soluble powders, calcium nitrate, potassium nitrate, lo-biuret urea, ammonium sulfate, and ammonium nitrate. If adding another Nitrogen source, adjust the Nitro-Blend 27-0-0 rate accordingly to deliver the desired Nitrogen content. Due to the many types of water quality, always perform a compatibility test prior to the first tank mix to identify any potential site-specific issues.

FEATURES AND BENEFITS

- Nitro-Blend 27-0-0 delivers Urea, Ammonium and Nitrate forms of Nitrogen to promote vascular balance.
- Stabilized Nitrogen allows use of lower rates to achieve the desired results without risk of volatilizing.
- Compatible with a wide array of products and raw source materials.

PRODUCT HIGHLIGHTS

- Three Nitrogen Sources
- Promotes Vascular Balance of Nitrogen
- Stabilizers Prevent Volatilizing-Gassing Off
- Enzymes and Natural Fermentation Extracts
- Contains natural organic and amino acids
- Apply via Spray Applications or Fertigation
- Tank Mix Compatible
