

\$T\$ Huma Rich™

\$T\$ Huma Rich™ is a blend of multiple high-quality ingredients that include organic biomass biochar designed using Engineered Biocarbon™ Technology. This material resists breaking down over time. \$T\$ Huma Rich is designed to improve some soil properties such as ion exchange capacity, porosity, and to enhance water and nutrients retention.

Application Rates and Guidelines

\$T\$ Huma Rich™ can be pre-blended with the root zone mix, applied and scratched in to the top 2" to 6" prior to broadcasting seed on bare soil, laying sod or sprigging, or simply drag in with the sand after core aeration (minimum ½" core aeration works best).

New Construction / Renovation: (Pre-Blended or roto-tilled to the desired depth)
150 to 200 lbs./1000 sq. ft. for 6-inch depth

Pre-Sod for Turf Establishment and Rooting:
50 to 100 lbs./1000 sq. ft.

Post Core Aeration:
10 to 25 lbs./1000 sq. ft. 2-4 times per year (Can be pre-blended with sand if desired)

Newly Planted Trees and Plants:
Mix 5% to 10% by volume with existing soil

Existing Trees and Plants:
Spread 2 to 3 pounds per DBH and work it in above root zone

Gardens:
50 lb. Bag will cover 250 to 500 sq. ft. Spread evenly and work into top 3" to 6" (Roof Top Gardens – Consult with Engineer)
